it — Quando a metà anni Novanta i primi modelli Helsinki sono entrati in produzione – inizialmente tavoli e accessori per la casa e l'ufficio – il design dell'arredo stava vivendo una fase di riassestamento.

Dopo le stravaganze e gli eccessi del postmoderno, cominciava a diffondersi un generale desiderio di sobrietà e semplicità. All'elogio radicale della decorazione, del frammento, dell'effimero, si sostituiva la ricerca di una rinnovata coerenza formale; al manierismo hi-tech, l'esplorazione di una funzionalità solida e discreta. Per alcuni queste tendenze erano solo un'onda da seguire, un'opzione possibile in un sistema dominato dal proliferare sempre più rapido di proposte e varianti. Per altri, come i fratelli Orsenigo, fondatori di Desalto, si trattava invece di una missione: definire nuovi archetipi ricollegando il design all'essenza del vivere la casa e l'ufficio. Dalla sua nascita, nel 1990, Desalto ha scelto di realizzare i valori di armonia, equilibrio, eleganza e versatilità attraverso concept originali, sviluppati all'intersezione fra cultura del progetto, aggiornamento tecnologico e qualità produttiva. La collezione Helsinki progettata da Caronni + Bonanomi – arricchita di nuovi elementi, complementi e finiture – esprime da oltre vent'anni questa filosofia, ispirando diverse possibili storie per il nuovo millennio.

en — When the first Helsinki models entered production in the mid Nineties – initially tables and home and office accessories – furniture design was undergoing a phase of readjustment. After the extravagances and excesses of Postmodernism, people started to seek moderation and simplicity. The radical praise of ornamentation, of the fragment, the ephemeral, was replaced by the search for a new formal consistency; hi-tech mannerism was replaced with exploration of solid, sober functionality. For some, these tendencies were only a trend to be followed, a possible option in a system dominated by the increasingly rapid proliferation of proposals and variants. Others, such as the Orsenigo brothers, founders of Desalto, saw it instead as a mission to define new archetypes by reconnecting design with the essence of home and office living. Since its beginning in 1990, Desalto has engaged in producing the values

of harmony, balance, elegance and versatility by developing original concepts, born at the intersection of design culture and technological and manufacturing excellence. The Helsinki collection designed by Caronni + Bonanomi – enriched with new elements, accessories and finishes – has expressed this philosophy for over twenty years, inspiring different possible stories for the new millennium.

de — In den frühen 1990er Jahren, als die ersten Helsinki-Modelle in Produktion gingen – anfangs Tische und Einrichtungszubehör für Wohnung und Büro – erlebte Möbeldesign eine Phase der Neuordnung. Nach der exzessiven Extravaganz der Postmoderne entstand wieder das Verlangen nach Schlichtheit und Einfachheit. Auf einen extrem ornamental, fragmentarischen und vergänglichen Stil folgte die Suche nach ausgewogenen Formen; auf Hightech-Manierismus die Auslotung einer soliden, diskreten Zweckmäßigkeit. Für manche waren diese Trends nur eine der möglichen Optionen im System, das in rascher Folge eine Vielzahl neuer Vorschläge und Varianten hervorbrachte. Für andere – wie für die Familie Orsenigo, Gründer von Desalto – war es eine Mission: neue Archetypen zu definieren, die Design wieder mit der wahren Lebensqualität in Wohnung und Büro verbinden konnten. Seit der Gründung im Jahr 1990 setzt Desalto auf Harmonie, Ausgewogenheit, Eleganz und Vielseitigkeit, mit eigenständigen Entwürfen, die Designkultur, moderne Technik und hochwertige Fertigung verbinden. Die Kollektion Helsinki von Caronni + Bonanomi – bereichert durch neue Elemente, Accessoires und Ausführungen – ist seit mehr als zwanzig Jahren Ausdruck dieser Philosophie und Inspiration für mögliche Entwicklungen im neuen Millennium.

fr — Quand au milieu des années 90, les modèles Helsinki sont entrés en production – au début, des tables et des accessoires pour la maison et le bureau – le design du meuble vivait une phase de réajustement. Après les extravagances et les excès du postmodernisme, un désir général de sobriété et de simplicité s'affirmait. L'éloge radical de la décoration, du fragment, de l'éphémère était remplacé par la recherche d'une cohérence formelle renouvelée, le manierisme hi-tech, par l'exploration d'une fonctionnalité solide et discrète.

Pour certains, ces tendances n'étaient qu'une vague à chevaucher, une option dans un système dominé par la prolifération de propositions et de variantes. Pour d'autres, comme les frères Orsenigo, fondateurs de Desalto, il s'agissait au contraire d'une mission: définir de nouveaux archétypes en reliant le design à l'essence de vivre la maison et le bureau. Depuis sa naissance en 1990, Desalto a choisi de réaliser les valeurs d'harmonie, équilibre, élégance et flexibilité à travers des concepts originaux, développés au croisement entre culture du projet, actualisation technologique et qualité de production. La collection Helsinki conçue par Caronni + Bonanomi – enrichie de nouveaux éléments, accessoires et finitions – exprime depuis plus de vingt ans cette philosophie, en inspirant différentes histoires possibles pour le nouveau millénaire.

es — Cuando a mediados de los años noventa entraron en producción los modelos Helsinki –inicialmente mesas y accesorios para la casa y la oficina–, el diseño del mobiliario estaba viviendo una fase de reorganización. Después de las extravagancias y los excesos de la postmodernidad, empezaba a difundirse un deseo general de sobriedad y sencillez. El elogio radical de la decoración, del fragmento, de lo efímero se sustituyó por la búsqueda de una renovada coherencia formal; el manierismo hi-tech por la exploración de una funcionalidad sólida y discreta. Para algunos esta tendencia era solo una ola que seguir, una opción posible en un sistema dominado por la proliferación cada vez más rápida de propuestas y variaciones. Para otros, como los hermanos Orsenigo, fundadores de Desalto, se trataba de una misión: definir nuevos arquetipos volviendo a conectar el diseño a la esencia de vivir la casa y la oficina. Desde su nacimiento, en 1990, Desalto ha optado por desarrollar los valores de armonía, equilibrio, elegancia y versatilidad a través de conceptos originales elaborados en la intersección entre cultura del proyecto, actualización tecnológica y calidad productiva. La colección Helsinki, diseñada por Caronni + Bonanomi –enriquecida con nuevos elementos, complementos y acabados– expresa desde hace más de veinte años esta filosofía, e inspira diversas historias posibles para el nuevo milenio.

it — A volte è la scoperta di un dettaglio: un libro lasciato aperto, l'alito del vento in giardino, un raggio di sole sulla parete, la trama sottile del marmo. A volte è una percezione d'insieme: la geometria di linee e volumi, il dialogo discreto dei colori, il respiro dei pieni e vuoti, l'armonico trascorrere di luci e ombre. Sentirsi a casa è più che abitare uno spazio fisico. È la modulazione di un luogo interiore, un punto di origine e ritorno fatto di oggetti e impressioni, un equilibrio che si rinnova fra prossimità e distanza, attesa e compimento.

en — Sometimes it's the discovery of a detail: a book left open, a breath of wind in the garden, a ray of sunshine on the wall, the subtle grain of marble. Sometimes it's the overall perception: the geometry of lines and volumes, the quiet dialogue between colours, the effect of solid and empty spaces, the harmonious fleeting of lights and shadows. Feeling at home is more than living in a physical space. It is the modulation of an interior place, a point of origin and return made up of objects and impressions, a balance between proximity and distance, between awaiting and completion.

de — Manchmal ist es ein Detail: ein aufgeschlagenes Buch, ein Lufthauch im

Garten, ein Sonnenstrahl auf der Mauer, ein Muster im Marmor. Manchmal ein Gesamteindruck: die Geometrie von Linien und Volumen, ein diskreter Dialog von Farben, die Großzügigkeit von vollen und leeren Räumen, die Harmonie von Licht und Schatten. Sich zu Hause fühlen ist mehr als einen Raum zu bewohnen. Es ist eine Verinnerlichung, ein Ausgangspunkt und Ort der Rückkehr, gemacht aus Gegenständen und Empfindungen, einer Ausgewogenheit von Nähe und Ferne, Erwartung und Erfüllung.

fr — Parfois, c'est la découverte d'un détail : un livre laissé ouvert, le souffle du vent dans le jardin, un rayon de soleil sur le mur, la fine trame du marbre. Parfois, c'est une perception d'ensemble : géométrie de lignes et de volumes, dialogue discret des couleurs, respiration des pleins et des vides, alternance harmonieuse de lumières et d'ombre. Se sentir chez soi, c'est plus que le fait d'habiter un espace physique. C'est la modulation d'un lieu intérieur, un point de départ et de retour fait d'objets et d'impressions, en équilibre entre proximité et distance, attente et accomplissement.

es — A veces se trata de descubrir un detalle: un libro dejado abierto, un soplo de viento en el jardín, un rayo

de sol en la pared, la trama sutil del mármol. A veces es una percepción de conjunto: la geometría de líneas y volúmenes, el diálogo discreto de los colores, la respiración de espacios llenos y vacíos, el armónico transcurso de luces y sombras. Sentirse en casa es más que habitar un espacio físico. Es la modulación de un lugar interior, un punto de origen y retorno hecho de objetos e impresiones, un equilibrio que se renueva entre proximidad y distancia, espera y acción.

work/office

it – Work in progress: nella società della conoscenza l'ufficio appare sempre più come una costruzione dinamica, un'installazione che si articola attorno ai modi e alle pratiche del lavoro, interpretandone i flussi e i ritmi mutevoli. Nuovi concetti e parole chiave emergono periodicamente, ridefinendo gli obiettivi per architetti e designer – mobilità, continuità, personalizzazione, condivisione, ibridazione. In questo scenario, mentre le trasformazioni innescate dalle nuove tecnologie annunciano il dissolversi di ogni confine fisico o concettuale, rimane immutata l'esigenza di base: un sistema razionale e versatile, per organizzare e gestire funzioni, idee e relazioni.

en – Work in progress: offices in the knowledge-based society increasingly resemble as a dynamic construction, installation built around working methods and practices, of which they interpret the flows and rhythms. New concepts and key words emerge periodically, re-defining the agenda for architects and designers – mobility, continuity, customisation, sharing, hybridisation. In this scenario, while the transformations triggered by new technologies announce the dissolution of all physical and conceptual boundaries,

the basic requirement remains unchanged: a rational and versatile system for organising and managing functions, ideas and relations.

de – Work in Progress: in unserer aufgeklärten Welt ist das Büro immer mehr eine dynamische Konstruktion, eine Installation, die auf unsere moderne Arbeitsweise abgestimmt ist und ihre veränderlichen Abläufe und Rhythmen interpretiert. So entstehen neue Begriffe und Schlüsselworte, die den Zielen von Architekten und Designern eine neue Definition geben – Mobilität, Kontinuität, individuelle Gestaltung, Teamarbeit, Mischformen. Vor diesem Hintergrund, wo sich durch neue Technologien physische und begriffliche Grenzen auflösen, bleibt ein Grundbedürfnis unverändert: das nach einem rationalen, flexiblen System, um Funktionen, Ideen, Beziehungen zu ordnen und zu verwalten.

fr – Work in progress : dans la société du savoir, le bureau apparaît de plus en plus comme une construction dynamique, une installation qui s'articule autour des modes et des pratiques du travail, en interprétant les flux et les rythmes changeants. De nouveaux concepts et mots-clés émergent périodiquement, en redéfinissant les objectifs pour les architectes et les designers – mobilité,

continuité, personnalisation, partage, hybridation. Dans ce scénario, tandis que les transformations provoquées par les nouvelles technologies annoncent la dissolution de toute limite physique ou conceptuelle, l'exigence de base reste inchangée : un système rationnel et polyvalent, pour organiser et gérer les fonctions, les idées et les relations.

es – Trabajo en curso: en la sociedad del conocimiento la oficina es cada vez más una construcción dinámica, una instalación articulada en torno a las formas y las prácticas de trabajo, interpretando sus flujos y ritmos cambiantes. Nuevos conceptos y palabras clave que emergen periódicamente y redefinen los objetivos para arquitectos y diseñadores: movilidad, continuidad, personalización, colaboración, hibridación. En este escenario, mientras las transformaciones provocadas por las nuevas tecnologías anuncian la disolución de las fronteras físicas o conceptuales, permanece invariable la exigencia de base: un sistema racional y versátil para organizar y gestionar funciones, ideas y relaciones.

it — In una delle *Lezioni americane*, Italo Calvino proponeva la “leggerezza” come un valore fondamentale per il nuovo millennio.

Il suo non era lelogio della frivolezza o di unastrazione senza corpo, né una fuga nel sogno, nellirrazionale che svanisce rapidamente. Per lui la leggerezza era piuttosto un approccio al mondo: un lavoro di “sottrazione di peso”, contro lopacità e la pesantezza del reale. Calvino parlava di letteratura, ma la sua lezione offre una visione quanto mai adatta per il design contemporaneo, lindicazione di un principio costruttivo ideale dove la semplificazione, la riduzione ai componenti essenziali, è condotta secondo precisione e razionalità.

en — In one of his *Six Memos for the Next Millennium*, Italo Calvino proposed “lightness” as a fundamental value for the new millennium. His was not a praise of frivolity, or an abstraction devoid of body, nor an escape into a dream, into the irrational that quickly dissipates. He saw lightness rather as a way of approaching the world, working to “subtract weight” to contrast the opacity and heaviness of the real. Calvino was talking about literature, but his lecture offers a vision that is more relevant than ever to contemporary design, it indicates an ideal

construction principle whereby simplification, reduction to essential components, is conducted in accordance with precision and rationality.

de — In einer seiner *Harvard-Vorlesungen* schlug Italo Calvino „Leichtigkeit“ als einen wesentlichen Wert für das neue Jahrtausend vor. Er plädierte aber nicht für Frivolität oder substanzlose Abstraktion, nicht für eine Flucht in Träume, in das Irrationale, das sich rasch verflüchtigt. Für ihn war Leichtigkeit ein Zugang zur Welt: eine „Subtraktion von Gewicht“ gegen die Dumpfheit und Schwere des Realen.

Calvino sprach von Literatur, aber seine Vorlesung bietet eine Vision, die sehr gut auch auf das zeitgenössische Design zutrifft: ein ideales Konstruktionsprinzip, wo Vereinfachung und Reduzierung auf die wesentlichen Komponenten präzise und rational verwirklicht werden.

fr — Dans lune de ses *Leçons américaines*, Italo Calvino proposait la « légèreté » comme une valeur fondamentale pour le nouveau millénaire. Il s'agissait pas pour lui de faire l'éloge de la frivilité ou d'une abstraction sans corps, ni d'une fuite dans le rêve et l'irrationnel qui s'évanouit rapidement. Pour lui, la légèreté était plutôt une approche au monde :

un travail de « soustraction de poids », contre lopacité et la pesanteur de la réalité. Calvino parlait de littérature, mais sa leçon offre une vision parfaitement adaptée au design contemporain, lindication dun principe de construction idéal où la simplification, la réduction aux composants essentiels, est menée avec précision et rationalité.

es — En una de las *Seis propuestas para el próximo milenio*, Italo Calvino proponía la «levedad» como un valor fundamental para el nuevo milenio. El suyo no era un elogio de la frivolidad o de una abstracción incorpórea, ni una fuga hacia los sueños, la irracionalidad que se desvanece rápidamente. Para él, la levedad era más bien una aproximación al mundo: un trabajo de «sustracción de peso», contra la opacidad y la pesadez de lo real. Calvino hablaba de literatura, pero su lección ofrece una visión, como mínimo, adecuada para el diseño contemporáneo, la indicación de un principio constructor ideal en el que la simplificación, la reducción a los componentes esenciales se realiza con precisión y racionalidad.

designer

Caronni + Bonanomi

it — Flavio Caronni dai primi anni Settanta si occupa di arredamento e architettura d'interni. Nello stesso periodo Donato Bonanomi svolge la sua attività di design per l'industria tessile. Il loro incontro, dalla metà degli anni Ottanta, li vede insieme in diversi progetti e concorsi, in particolare interventi di edilizia residenziale.

Nel 1990 fondano uno studio associato occupandosi di progettazione residenziale e industriale, di recupero e ristrutturazione, architettura d'interni e design.

en — Flavio Caronni from the early Seventies dealt with furniture and interior design. At the same time Donato Bonanomi developed his activity as designer for the textile industry. Their joint venture, from the mid Eighties, has put them together in different projects and contests, in particular the ones regarding residential housing. In 1990 they set up an architecture studio for residential and industrial projects, development and renovations, indoor architecture and design.

de — Flavio Caronni ist seit den 1970er Jahren im Möbel- und Einrichtungsbereich tätig. In den gleichen Jahren arbeitet Donato Bonanomi als Designer für die Textilindustrie. Ihre

Zusammenarbeit begann Mitte der 1980er Jahre und betrifft verschiedene Planungen und Wettbewerbe, vor allem im Rahmen von Wohnbauprojekten. 1990 gründeten sie ein gemeinsames Büro und beschäftigen sich mit der Planung von Wohn- und Industriebauten, Sanierungs- und Revitalisierungsprojekten, Innenarchitektur und Design.

fr — Depuis le début des années 70, Flavio Caronni s'occupe de décoration d'architecture intérieure. Pendant la même période, Donato Bonanomi travaille comme designer pour l'industrie textile. Leur rencontre, au milieu des années 80, aboutit à une collaboration sur différents projets et concours, en particulier des interventions de construction résidentielle. En 1990, créent un cabinet associé s'occupant de conception dans le secteur résidentiel et industriel, de réhabilitation et restauration, d'architecture intérieure et de design.

es — Flavio Caronni se ocupa de mobiliario y arquitectura de interiores desde principios de los años setenta. En el mismo período Donato Bonanomi realiza su actividad de diseño para la industria textil. Su encuentro, a mediados de los ochenta, los lleva a trabajar juntos en diversos proyectos y concursos,

en particular intervenciones de construcción residencial. En 1990 fundan un estudio para llevar a cabo proyectos residenciales e industriales, recuperación y rehabilitación, arquitectura de interiores y diseño.
